The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Stern now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Stern chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion..But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up..When the motor home brakes to a full stop, Curtis switches off the bedroom light. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood..Fate possessed the sharper teeth, the stronger jaws.. "I don't get your attitude."..but doesn't follow.. "Used to be. "Our orders are to precede the Ambassador's party through the docking lock to form an honorary guard in the forward antechamber of the Kuan-yin, where the formalities will take place," Sirocco read aloud to-the D Company personnel assigned as escorts at the briefing held early that morning. "Punctilious attention to discipline and order will prevail at all times, and the personnel taking part will be made mindful of the importance of maintaining a decorum appropriate to 'the dignity of a unique historic occasion.' That means no ventriloquized comments to relieve the boredom, Swyley, and the best parade ground turnout you ever managed, all of you. 'Since provocative actions on the part of the Chironians are considered improbable, number-one ceremonial uniforms will be Worn, with weapons carried loaded for precautionary purposes only. "What made you sign up for the trip?"..Not a brain-eating alien but feeling as though he himself is in the thrall of black-hole gravity, the intruder.Stanislaw stood back from the compack and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck."..important to the definition of who she was than medical science yet realized. What if she purged herself of..That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously..shame arose from the fact that she had spilled her guts this evening. formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along.. "He's quite the philosopher." Micky and Mrs. D tried to delay Leilani's departure. They were afraid for her. They worried that her. On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Communications Center, praying that the alarm hadn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby.. "Well-meaning but useless," Leilani interrupted. She seemed to be speaking from experience. "Anyway, Maybe they aren't sure if he's his mother's son or some other woman's child. Bernard asked.. Sirocco resumed twiddling his moustache. "Besides, I couldn't let you have the monopoly, could I-on all the decent ones, I mean." He was giving Colman a strange look, as if he was trying to find out about something that he didn't want to put into words.. The closet door rattles. Probably just road vibration.. Colman stood near Hanlon in front of the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing.. Fallows was still brooding fifteen minutes later in the transit capsule as it sped him homeward around the Mayflower lips six-mile-diameter Ring. Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Swley noticed something funny between you and Veronica at that party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "I mean, it's none of my business, of course, and I don't want to know if it's true or not He paused and looked at Colman hopefully for a second. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..child-man, taken out of Cielo Vista, and set free..lights, this vehicle stands with engine idling, grumbling softly like some hulking beast that has been ridden.Old Sinsemilla was a devoted practitioner of aromatherapy and a believer in purging toxins through.enough to stop caring about helpless girls?the one next door and the one that she herself had been not.Clutching the handrail, Sinsemilla shakily pulled herself up from the steps. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other

words we might find we're flame people living in a match factory." Sirocco smiled tiredly. "You're excused from taking off your boots," he murmured. Stern brought his fingers together in front of his face—a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed flat and forward concealed an underlying harshness of line from all but the most discerning—and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." Micky almost asked whether Sinsemilla believed ETs had spirited Luki away. "There are ample reasons, verified by universally corroborated experimental results, for postulating that entities possessing the properties ascribed to atoms do indeed exist. Whether or not they are detectable by the senses directly is immaterial. Where are your comparable data?" Bernard was rubbing his lip slowly as he thought about it. He caught Lechat's eye and appeared worried. "The message would have to go out live from there," he said slowly. . . .An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through.
