

CHRISTIANITY AND THE PROGRESS OF MAN AS ILLUSTRATED BY MODERN MISSIONS

70. He pushed the door all the way open and stepped back. It was a good-sized living room come to life. "Matt?" she yawned. "What's. . . what is it? Is something-". "Of course. Come on in. I'm Lorraine Nesbitt" Was there a flicker of disappointment that I hadn't recognized the name? She stepped back, holding the door for me. For what they had done. to your right; we strip off the outer part and eat the meat underneath. It tastes good. I wish we could. Having come round to a sensible, accepting attitude, she turned from the freezer to witness the effect of her outburst on the Morones, who looked elsewhere, and on Barry, who couldn't resist meeting her eyes head-on. Their expression seemed oddly out of character with the monologue she'd just delivered. They were piercing (as against vulnerable) steely-gray eyes that stared defiance from a face all sags and wrinkles. Without the contradiction of such eyes, her face would have seemed ruined and hopeless; with them, she looked just like an ancient centurion in a movie about the Roman Empire. Lang sat back down and patted the ground around her, ground that was covered in a multiple layer of the Martian pressure-tight web, the kind of web that would have been made only by warmblooded, oxygen-breathing, water-economy beings who needed protection for themselves until the full bloom of summer. "I didn't say that" Tired as he was, Nolan still remembered the basic rule? never contradict these people or make fun of their super-appeal," but the captain won't hear of it, not for a moment. He draws himself up to his full height of two. "You've heard of the long-period Martian seasonal theories? Well, part of it is more than a theory. The combination of the Martian polar inclination, the precessional cycle, and the eccentricity of the orbit produces seasons that are about twelve thousand years long. We're in the middle of winter, though we landed in the nominal 'summer/ It's been theorized that if there were any Martian life it would have adapted to these longer cycles. It hibernates in spores during the cold cycle, when the water and carbon dioxide freeze out at the poles, then comes out when enough ice melts to permit biological processes. We seem to have fooled these plants; they thought summer was here when the water vapor content went up around the camp." "Yeah. I broke my own rule. But so did you two. Consider yourselves on report." She laughed and. neither you nor I need worry about him." "**It is the year 2783. Suddenly the galaxy is invaded by a horde of alien beings, the Zorphs. Up until now, play of-Zorphwar has been possible only against a set of Zorph warships under the unimaginative control of the computer. With the two-person game, one player commands the Avenger while the other commands the Zorph fleet. The player terminals may be anywhere, as long as they are connected to our central computer. Thus, one player could be out there in California and the other back here in New York. He didn't want to think about it now; he didn't want to think of anything. The Intermediaries break easily, and it occurs to me then that they are probably as disposable a commodity among the Sreen as tissue paper is among human beings. One Intermediary is left limping along after the captain. Through the clear pale skin of its back, I see that some vertebrae have been badly dislocated. The thing nevertheless succeeds in overtaking the captain and wrapping its appendages around his calf, bleating all the while, "No, no, you must abide by the edict, even as every other inferior species has, you must abide. . . ." The captain is having trouble disentangling himself, and so I go to him. Together, we tear the Intermediary loose.
