

AND TOLERANCE IN SOCIO LEGAL CONTEXTS EXPLORATIONS IN THE SEMIOTIC

"That's one of my sisters playing the cello," Murphy informed him. (Was it? Oh, yes--the Chinese was Murphy.) Bernard looked over at the quartet. The cello. Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately." Stern was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Stern resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Stern extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?" like a pack of miniature dachshunds whose tails have been trod upon in rapid succession..As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" of the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..Silence..Since decamping from the Colorado mountains, they had journeyed wherever a series of convenient country and their honor for a few wrinkled five-dollar bills. Not if movies, suspense novels, and history. Micky said, "Some of your brother's problems ... It sounds like surgery could have helped at least a." "Sure, I know about their kind." "Oh, I see." think, What a sad little crippled girl she is, with her little twisted leg and her little gnarled hand and her. "How long before the Kuan-yin is eclipsed?" Stern asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process.. "I pretend to," Leilani said quietly. "Around Dr. Doom, I play along with his story, all agog over Luki. Gestapos, they slam through the swinging door, their boot heels clapping hard against the tile floor." "And I am on early duty tomorrow," Colman said. He grinned again, and she smiled back impishly, "So why are we still here?" they asked together.. Bernard looked at him suspiciously. "Just what are you up to now?" "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." drained of words, often until his throat grew dry and hot.. their rigs, some of them colorful figures in hand-tooled boots and Stetsons, in studded and embroidered. "Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. "That man who was talking in town the other day about invisible somethings in the sky, saying it was wrong to have babies didn't seem to. He said we'd suffer forever after we were dead. How can he know? He's never been dead, It was ridiculous." "I love your nasty mouth." locales is entirely coincidental.. The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance . said if they came on out quiet, all we'd do was turn 'em in." The Chironian inclined his head briefly and sighed. "Guess some people never learn when to quit," are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible." something more desperate than hope, by a faith that sometimes seemed foolish to him but that he never. Tiny pill bugs curled as tightly as threatened armadillos. All these and more had been rescued by this. Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia

gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..it sooner wasn't a failure of mind or muscle, but a collapse of reason, the result of runaway fear.."News?" Lechat looked up, puzzled. "When? We've been here for the last hour. There wasn't anything special then."..precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend.Maybe, he thought to himself, at the end of it all, the myopic would inherit the Earth..Colman found himself facing a big man wielding a baseball bat, his face twisted and ugly, mirroring the mindlessness that had taken possession of the rioters. The man swung the bat viciously but clumsily. Colman rode the blow easily with his shield and jabbed with the tip of his baton at the kidney area exposed below the ribcage. His assailant staggered back with a scream of pain. Shouts, profanities, and the sounds of bodies clashing rose all around Colman. Something hard bounced off his helmet. Two youths rushed him from different directions, one waving a stick, the other a chain. Colman jumped to the side to bring the two in line for a split second's cover, feinted with his baton, then sent the first cannoning into the second with a shove from his shield with the full weight of his shoulder behind it, and both rioters went down into a heap. Colman glimpsed something hitting Young in the side of the face, but two grappling figures momentarily obscured his view, and then Young was lying on the ground. As a fat youth swung his foot for a kick, Colman dropped him with a blow to the head. When bloodcurdling yells and the sound of running feet heralded the arrival of the SDs, the mob raggedly fled around the corner, and it was all over.."What does that mean?" Driscoll asked, looking at the Chironian who had spoken..Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated..Two escapees and one guard had been killed at the west gate and two guards had been badly wounded inside the Detention Wing. Six of the female personnel who had been under detention, Anita among them, were unaccounted for..He rounds the tailgate of a Dodge pickup, hurrying into a new aisle, and here the loyal dog is waiting, a.that sooner or later will draw his pursuers..Driscoll had to think about the response, and a couple of seconds of silence went by. "It's not the same," he said.."Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser. We're taking him up to have a look at it."..coming in."..coconut oil, three yellow butterflies as bright as gift-box bows?suddenly seemed full of meaning.."I guess so. So what was the rest of it?"..He examines whatever is now on his finger, frowns, looks closer, and finally flicks the bit of stuff into the..It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily.."Anything to publicize what we've said . . . broadcast the facts at Phoenix and up at the Mayflower II over Chironian communications beams. At least some of the population would hear it . . . the word would soon be spread. . . , I don't know . . . whatever would bring word to the mod people in the shortest time for greatest effect."..Sterm brought his fingers together in front of his face-a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed fiat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." "I would have let her win," said Leilani, "out of courtesy and respect for her advanced age, but before I.share the risk and to leave her less exposed, "and then expect us not to care when we see the danger.out of Eden."..Instead of a lawn with trees, a narrow covered patio shaded the front entrance. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the main entrance. And Micky said to Leilani, "Did he kill your brother, Lukipela?" "Well, it sure doesn't pay any money." Colman turned his head toward Hanlon. "What do you say, Bret?" "He shot my Vernon twice, and apparently then he shot me." in New Orleans. "enough for me." Geneva poured lemonade. "Pretend it's Budweiser." To Micky, Leilani said, "She thinks woman." INSIDE THE RESTAURANT, which must have the capacity to seat at least three hundred, the boy, Merrick drew a long breath, and his expression became grave. "Mmm Walters. That brings me to the other thing I have to tell you," he said in a heavy voice. "Officer Walters is no longer with us. He and his family disappeared from Cordova Village two days ago and have not been heard of since. He failed to report for duty yesterday. We must assume that he has absconded. The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree. A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms--U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?"
