

## **FLORE DES SERRES ET DES JARDINS DE LEUROPE**

"Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon. Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen. Drawing upon the messy experience of giving the dog a drink from a bottle of water in the Explorer, he. The chopper might not be aloft yet, just getting up to power while the troops reboard. thing, okay?" twice, and I don't mean dirty-old-man-going-to-jail touching. Just ordinary touching. Both times, so much. Although a couple hundred people are nearby, this place in this moment of time seems as lonely as any. "Will do. See you in a few minutes." she had been six years old then, seven at most, and wretchedly jejune. Jejune was a word she liked a lot. "Does the little orange lady like the dark out?" Rickster asked. "You don't sound like a guy who wants to be friends." inch or two from the ground and hidden by glossy cascades of hair that appeared to be white in the. Bernard's eyes narrowed a fraction. It tied in with what Kath had said at the fusion complex, if the rationalizations were stripped away. So what was Merrick doing- increasing the intended overseeing force because the Directorate had decided to go ahead with the plan, using Padawski as an excuse? "I'm not sure that I do," he replied. "It sounds as if you're talking about taking over some of the key Chironian facilities. Wouldn't that only make any trouble worse?'. Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose..with wonder as she contemplated the immensity of creation. "Raised in a box?". He wasn't a diddler. She'd told Micky the truth about that. "My age?". Leilani, but he better stay on his side of the fence. ".mutant." "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Not very fancy, but." "Me?" Jay exclaimed. "I'll come long, sure, but I thought it was you who couldn't resist it." he can see those pages as clearly as the pages of any real book that he's ever read, chapter after chapter. progresses by hitch and twitch through the kitchen, cooks and bakers and salad-makers and dishwashers. he shouted at Harding. "Fire at any SD's who get in the way. They know we're here now." He turned to the others. "Grab those two and stick with me. You two, stay with Crosby and cover the rear. Okay, let's get the hell out." "Well, yes, except for that," Geneva agreed. "But he came up to the cash register with this lovely smile.. Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft.. "If you've never read Scrooge McDuck comic books, my literary allusion will be lost on you." contain a collection of severed feet.. "You can say that again," Bernard agreed. Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms. Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood

that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too? "maybe you'll realize your palm-shaded terrace isn't in Heaven." "What stuff?" Bobby asked. "Drugs do terrible damage," Aunt Gen said with sudden solemnity. "I was in love with this man in. hateful serpent had slipped under the collar of her T-shirt and along the small of her back.. "Don't you think stealing people's homes and throwing them out is violent enough?" Jean asked from one of the dining chairs, while Jay listened silently from across the table. "What were they supposed to do? They ignored the soldiers and settled it with the man responsible. He should have been expecting it." "Good pup.. Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." "Even though he kills old ladies and boys in wheelchairs?". level of ambition is about I hat of an old basset hound on a hot summer afternoon." Bernard shook his head in a way that said he rejected the suggestion totally. "They wont they're not like that. They just don't think that way." When brittle wood cracked and she felt a picket underfoot, she knew that she'd found the passage in the. but another who's on his way into the restaurant. "That's sure a fine tailwagger you have there," the. discover a boy and his dog. Surprise freezes her in mid-chew, with her hand halfway to her mouth, and in. When he trailed off, she finished for him: "Then screw it." PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters.. The party ascended the main staircase, at the top of. "I was only trying to?" .dreadfulness would not merely have embarrassed Aunt Geneva; it would have shocked and appalled her.. "You're just humoring kids." .expectancy.. Colman nodded. "Gone to the storeroom with Hanlon and Lechat. Everything was quiet upstairs when we left". Leilani timed her mother's pulse. Regular but fast. Metabolism racing to rid the body of drugs.. The others watched as he pulled the unit out, accepting the call with a flip of his thumb, Judge Fulmire peered from the miniature screen. "Are you alone, Paul?" Fulmire asked without preamble. His voice was clipped and terse.. Maybe, he thought to himself, at the end of it all, the myopic would inherit the Earth.. lamps provides sufficient sour yellow light to reveal the animal's raised hackles.. driving machine says, and the dog obligingly swishes his tail, sweeping the pavement on which he sits.. candleglow.. Explorers opened for the boy, and he quickly slipped inside.. "You could talk to him. I know he listens to what you say. We've talked about things." Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink.. the way to Laura's room.. "You should try to find yourself, Steve. It's healthy." he murmured while Colman called the ambulance dispatcher on another panel. "Let's see who steps out from the wings now." Micky understood this special girl well enough to know that the mysteries of her heart were many, that. "Eating that stuff right before bed," Noah told him, "you're sure to have sweet dreams." Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. "When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me, Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that. I can't stand it." the trembling creature on the rear lawn, where it dashed out of sight into a bed of red and coral-pink. By the time Micky's vision cleared and her plate was clean, she was able to say, "I can do what I need. appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward. The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the

ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." Curtis, he examines his face in the mirror..often expected to find a secret door to fantastic other lands, but she had been routinely disappointed, so.The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the 'ladder, stepped backward off the platform .to slide gently down to the level below, and turned away to rejoin the others..Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..exotic places embodied in these superhighway Gypsies, the dog is curled compactly on the passenger's."We all have to pay our debts," Nanook said unhelpfully..once they were on the road again, old Sinsemilla might set the motor home on fire while cooking up rock.seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an.2. Unidentified flying object cults?Fiction..from one point of contentment to another, even from happiness to happiness, in lives with meaning..without adding two half-used pieces of apple pie to the mix..Affixed to the door is a stainless-steel plaque with laser-cut letters: "And you're saying the Big Bang was something like that?".Or, at least, the three that lived with him. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals---or for that matter any expectations for them to conform to any behavior pattern at all..The dim glow of the hallway ceiling fixture barely invaded the room. The shadows negotiated with the.meeting, however, he regarded her as he might have regarded a sister: with the desire only to protect her.With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..this sure is..".Three SDs and a slightly plump, middle-aged matron trying to climb over the fence," Hanlon said. "The woman was stuck on the top and making quite a fuss. Now, what do you imagine they could have been trying to run away from?" "You're wrong. It's hilarious." Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions.."Old Sinsemilla," said Leilani..6. Girls?Fiction. I. Tide..her chair with a hitch and pointed across the backyard. "What's that thing?".Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's.sink and tossed the can into the trash receptacle. "But the fact is that Dr. Doom would never touch me."Dry as a cracker..".He's saying money's nothing but vomit to him."..indisputably what his mind resists: This is no random event, but part of the elaborate design in a tapestry,..longer, twinkles diamond-bright and ruby-red. From this elevation, he can see the interdiction point to the.astonishingly clever tricks. When I saw what potential dogs possess, how smart they can be, I wondered."I suppose not." Sirocco conceded, deflating with a disappointed sigh. After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?". "I know, but I figured rd go take a 160k at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the

console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer skin, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. "It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom. "know why you can't, too, and that's all right." "scored six or eight points higher. Sinsemilla's not a boffo mom when it comes to keeping the fridge. omnium-gatherum of bath additives that any citizen of medieval times would have recognized her at once. one he'd made for Lukipela, and put her to sleep in it immediately, instead of waiting any longer for the. ebony accents, was a modified obelisk, not gracefully tapered like a standard obelisk, but of chunky. Budweiser, Micky imagined that she had glimpsed a soul suspended over an abyss. Most self-mutilators were deeply self-involved. A small number could be confidently diagnosed as. responded, never appeared to comprehend a sentence of his monologue. And yet he held forth until. "Of course they are. It's all a mess up there." The party arrived at the little-used connecting passage running behind the Fran?oise and its neighboring establishments, and the soldiers waited among the shadows of the surrounding entrances and stairways while Lechat tapped lightly on the rear door of the restaurant. After a few seconds the door opened and Lechat disappeared inside. Several minutes later the door opened again and Lechat looked out, peered first one way, then the other, up overhead, and then beckoned the others quickly inside. Many businesses were closed now, at 9:20 on a Tuesday night. "CHANGE ISN'T EASY, Micky. Changing the way you live means changing how you think. Changing." "So when are you going to show it to me?" Jay shrugged. "Any time you like." "You going to Jersey fight now?" "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response. Maybe ordinary drivers, maybe not. revelation of a sense of worthlessness that the girl would deny but that from personal experience Micky. Old Yeller? he follows the dog's example and holds his breath, the better to detect whatever noise. him. But she will never be at his side again in this life. "Of course it is.", Jay sighed wearily. "I wouldn't just walk in with it like this if I'd stolen it or something, would I?" "difficult to believe that a mere bullet wound could be the cause of such horrendous, tortured shrieks." "Okay, so you track it all back to the Big Bang," Jay said at last. "Then where do you go?" the pavement, the human Good & Plenty slammed the hammer against the hood of the car. "What's this?" she asked. She felt helpless, and she needed to keep her hands busy, because if her hands weren't occupied, her. bad news from which they should have been spared. Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again. and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been. Chapter 17. but doesn't follow. A few seconds of silence elapsed while the Chironians considered the suggestion. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Sterm really is? Now, if we could prove all the incidents, all at the same time-". "Fear implies respect," Leilani said. "Better than tofu and canned peaches on a bed of bean sprouts," Leilani said as she settled in a chair. Trusting the wisdom of his brother-becoming, the boy drops to his knees, braces one hand against the. BVG 10 9 8 7 6 5 4 3 2 1. "For being a good soldier and a lousy citizen." "And what's the logic, callin' this beauty Old Yeller, when there's not one yellow hair from nose to tail. smile, warm in even the most bitter wind, describing graceful arabesques upon her flashing blades, while. without toilets." She kissed the top of the girl's head. "And now I myself am off to have a nice sit-down." "I told him to stuff it. It's over. We can be us now. I'm going to spend three months studying plasma dynamics at Norday, and after that get involved with the new complex they're planning farther north along the coast. We can all move to Norday and live there until we find something more permanent."
