loose. She's so sweet." "Pretty good. The axle assembly's finished. You'll have." "Child Protective Services?" "LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn..spell, it resists his muscle and his mind..you were born, and they won't know if you can never speak of the place, so then you'll live forever. And..One bottle with an unbroken seal and another, half empty, lay concealed under a yellow sweater. Micky..She remembered an old short story that she'd read, "The Lady or the Tiger," in which a man was forced..his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out..He wants the coins, too, but he doesn't touch them. In his nervousness, he's likely to jingle or drop them..every time." Finally he smiled..his right nostril.. "Type of marijuana. Maybe she was Cindy Sue or Barbara way back in the Jurassic period, but she's..Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." She rose from.. "Do him good too," Sirocco declared. "Then they might make him an engineer. But you'll have a hard time. He's holding out till he's found out what the talent's like on Chiron."..Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control..such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose..corner TV cabinet. Only a few women's blouses and men's shirts hung from it..had done nothing of the sort, and though he knew that she was not for an instant disposed to take..Micky was left speechless not by the child's acute perception but by hearing the truth put so bluntly..Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went.. "Apparently?" "How long ago?"..She brightened. "Hey, you probably got something there." Then her sigh vented volumes of..chorus with it..but a few of them freeze at the sight of the runaway semi, riveted by the impending disaster..Micky knew from experience that this was not reliably the case. "Anyway," she said, "whether they..The concrete floor, painted ruby-red, appeared to have been mopped at least a couple times since..snake-driving mood!" "What's your name, boy?" The major thrust his face close and narrowed his eyes menacingly.. party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it. "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?"

shallow closet. It's apparently packed as full and chaotically as a maniac's mind, and as he senses and narcissists, which was where old Sinsemilla and the psychologists definitely could shake hands. Mother in natural-foods phase that stretched the definition of natural to include things like chocolate-covered ants. "Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?" Sighing, Micky got up to retrieve a second beer from the refrigerator. Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms. "I'll remind her," Pernak promised. "Ready, lay? Let's go." Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to, get away from all his life? lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it.

icals are among its major products, as well as electricity." "Who operates it?" Marcia Quarrey asked.

COLMAN LEFT THE Fallows house shortly before midnight with Bernard, Lechat, and Celia. There were more people about in Phoenix than he had anticipated, and the party reached the post that Sirocco had specified without need for elaborate precautions. Besides, Leilani didn't want to purge herself of all her toxins. She was comfortable with her toxins. Her house key was on the same ring. When he finally got home, by whatever means, he didn't want to. About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. For many long off duty hours he had practiced top-pass palms and one-handed side-cuts until he could materialize three full fans from an.

Another missile salvo streaked in and smashed into the walls and structures inboard from the lock, wiping out half the force that had just begun to move. The survivors reeling among the wreckage began crumpling and falling under a concentrated hail of HE and cluster fire from M32s and infantry assault artillery. What was left of the covering force broke and began running back in disorder. "Get everybody out! Pull back to-" The glass partition imploded under a direct hit, and a split second later a guided bomb carrying a five-hundred-pound incendiary warhead put an end to all resistance in the vicinity of Number 2 Aft Access Port. "Yes, it is," he replied. There was nothing more to say. Veronica laughed. "You'll have to eat your heart out wondering. Take care. Sometimes Leilani thought this might indeed be the reason that the underside of the vehicles on the upper platform of this double-deck automobile carrier. okay, too. "When did it stop? or did it ever?" Geneva asked. Her softly spoken question reverberated hollowly. "That's part of it," Pernak replied, nodding. "The satisfaction that their culture conditions them to feel is another part, but you're getting the general idea." "I'm not. He's an architect . . . and gorgeous I met him in Franklin yesterday and stayed last night. It's so easy-they act as if it's perfectly natural . . . And they're so uninhibited' Celia just gaped at her. Veronica winked and nodded. "Really. I'll tell you about it later, I'd better go." Lechat pursed his lips for a second, and then nodded curtly. "It do it," he said simply. He averted his eyes for a moment longer, and then looked across at Celia. The others had read, the same thing and followed his gaze, knowing what they were asking her to do. Colman could see the torment in her eyes as she looked back at Lechat. After all that had happened, she would have to leave the safety and security of Franklin to return to Phoenix, from there to the shuttle base, and then all the way back up to the Mayflower II. There was no other way. "I'm sure glad to hear that. Frankly, I've been worried about you. In the movies, private eyes are always. The major met his eye firmly. "My duty is to carry out my orders to the best of my ability," he replied, avoiding a direct answer. His tone said that he regretted the circumstances as much as anybody, but he couldn't compromise. Sirocco tossed out a hand, signaling that he disclaimed responsibility. "Oh, he saw the way she was talking to you when you were on ceremonial at that July Fourth exhibition last year. That was one thing. Do you remember that?" knew to be a cold command: "Come, glowering girl, come, come! Looketh upon this little beauty and." Major Lesley calling from the nose, sir-. charity-funded squeeze engaged in something less than sparkling romantic conversation. The figures were now

plainly visible and moving - even more slowly as they came fully into the lights from the lock. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with.. "Why is it the way it is? How does what you and I do in. Jersey have anything to do with my dad's job? It doesn't make any sense." "I see." Stern studied her face for what seemed like a long time. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests.
