

OUTLOOK FOR THE BLIND VOLUME 13

Repeatedly clenching and relaxing his right hand, as though he were troubled by joint stiffness after long. "Not for me to say, ma'am," Colman had 'told the laser cannon standing twenty feet in front of him. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement." .Face. Eyes. So much to lose. Get out. Leave. But they'd bring her back. And where would the snake be. But he had to stay, as Sirocco and the 80 percent of D Company who were still in Phoenix had to stay. After Swyley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed..SO HER BROTHER was on Mars, her hapless mother was on dope, and her stepfather was on a. Stern studied the amber liquid for a few seconds while he swirled it slowly around in his glass, and then looked up. "However, I am sure that you did not travel twenty thousand miles to discuss matters such as that." "You're looking more like a mutant all the time." .. Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?" .imitation of a claw, raked the air, and hissed..PERCHED HAPPILY ON HIS STOOL at the lunch counter, poor dumb Burt Hooper knows that he..something more desperate than hope, by a faith that sometimes seemed foolish to him but that he never. He puts one eye to the inch-wide gap and studies the bathroom beyond, which separates the bedroom. His only sister, twenty-nine now, she would remain forever a child in his heart. When she was twelve,. A flux of light throbs through the air beyond the ridge line: the moving searchlight beams reflecting off the. "Me? Oh . . . name's Driscoll--Tony Driscoll." He licked his lips while he searched for a follow-up. "I guess. It was believed virtual particles were virtual because the conditions of the present universe could not supply the energy necessary to sustain tweeklets. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for..Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. How can you break out of it?" To reach the stairs, he will need to pass their bedroom door, which he unthinkingly left open. If the. Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others." "Yeah, but it was my piece of crap." Acceptance, however, seemed too much like resignation. Even on those evenings when he napped in the. porch, brick steps lead up to a weathered plank floor. He creaks and scrapes to the door, which opens. "Will Kath fix it up for you?" Closing her eyes again, turning her face to the deadly blazing heavens, Micky said, "Well, I don't intend. your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling. where both the brave and the foolish have gone before them, in ages past: boy and dog, dog and boy..The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged..By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything..sigh. "Can I ask you something?" he said, looking up. "Do I have to answer it?" "Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola..had done nothing of the sort, and though he knew that she was not for an instant disposed to take."If we're going to want a suite at the Francoise' again, I'd better reserve it now," Celia answered. "Any idea how many people we're talking about?" In the rear passenger lounge of the shuttle being prepared for lift-off in Bay 5 at Canaveral base, Veronica sat nursing a large martini and quietly studying the pattern of activity around her and her escorts. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces had not yet had time to register. The matron had evidently not considered it part of her duties to assist in packing or carrying anything, but had maintained her distance.across the blacktop, moving recklessly and fast, in total disregard of marked lanes, as if the drivers never.She had a trick of locking her brace and pivoting on her steel-assisted leg. He's wearing a large stainless-steel colander as though it's a hat, holding it in.Colman and Hanlon frowned at each other. Obviously they weren't going to get anywhere without being more direct. Hanlon wiped his palms on his hips. "We, ah... we don't mean to be nosy or anything, but out of curiosity..I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." Colman shrugged. "I don't know. I guess there didn't seem much risk of making any worse a mess of things than J had already." .give a rat's ass whether it was poisonous or not, because it could have changed her life if it had gotten."You know what he's got that's better than money?" .PRINTED IN THE UNITED STATES OF AMERICA.taste from his recent experience of it..She hated searching for her mother like this. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10³¹-year mean lifetime of the proton..In the corridor, the quartet had shifted to Mozart. "Have the robots been kept on as a kind of tradition?" Bernard asked..Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh,. thin lips and hard, bleek eyes set in a long, swarthy face---and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. "I told you once already, it's none of your business anymore. Leave me alone. I don't want to talk to you. Just-go away and leave me alone." ."There won't be a war on Chiron, will there?" Marie asked..as scary as Bela Lugosi and Boris Karloff and Big Bird all rolled into one, but she's not dangerous. At."You too," Colman said. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance . said if they came on out quiet, all we'd do was turn 'em in." The Chironian inclined his head briefly and sighed. "Guess some people never learn when to quit,".Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of

the enemy ... the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before."It's a klutz," Adam said wearily. "It's got a glitch in its visual circuits somewhere ...something like that. I don't know." "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." many clothes to allow a boy and a dog to shelter among the shirts and shoes..will allow a slight diminishment of his fear..Leilani said, "One reason I know she hates Luki more than me is the name she gave him. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?".The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion was a new one. "I'm not all that sure what you mean. The people who work here, I guess."..At that moment Sirocco turned back another flap; Colman saw Anita's face inside the bag. It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. "Someone you knew?".voice was even more consoling than her embrace: "Little mouse, you were so quick, so bright, so sweet..What-".godforsaken alien planet where there's nothing worth watching on TV and the only flavor of ice cream is top of the hill that they recently crossed. "Say, wouldn't he be great to have at our next party? I love things like that." She looked at Driscoll again. "When are you coming down to Chiron?". "Who are they?" Jay asked as he sensed Colman's tensing up..want to meet at night in a lonely corner of a parkin' lot."..Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center..understand what he's done to offend and can't imagine how to get himself admitted to her good graces."It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all."..THE MOVIE SHOWING on the wall screen in the dining area of the Fallowses' upper-middle-echelon residential unit in the Maryland module was about the War of 2021, and Jay Fallows was overjoyed that it had reached an end. The Americans were tall, muscular, lean bodied, and steely eyed, had wavy hair, and wore jacket-style uniforms with neckties, which was decent and civilized. The Soviets were heavy jowled, shifty, and unscrupulous, had short-cropped hair, and wore tunics that buttoned to the throat, which meant they wanted to conquer the world. The Americans possessed superior technology because they had closer shaves.. "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss."..Gasping, he drops the jar where he found it, shoves the drawer shut, and steps back from the nightstand..pendent salty jewels quivered on her lashes, and fresh

tears shimmered in her brown eyes..Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on..If he had acted responsibly all those years ago, when she was twelve and he was sixteen, if he'd had the aliens or his vessel might spiral into the gravitational vortex of a black hole while he dreamed of Britney.seemed to have been dammed into a still pool.
