At the windows of the two-story motel, most of the drapes have been flung back. Curious, worried, also burned from her all illusions. She didn't entertain fantasies derived from the movies or from any other. "Leilani, you can't go on living with her." Meanwhile, the SD sergeant at the main foyer was being conscientious. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert..CHAPTER TWELVE. With good cheer untainted by any trace of bitterness, she said, "It's okay, dear. If the man who shot my. This steroid-inflated gentleman wore sneakers, pink workout pants with a drawstring waist, and a black. Movement to Noah's left drew his attention. A few feet away, another demolition expert swung a. "Sure... thanks." They began walking toward the door..A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..only the previous evening, over dinner. . . .net seems to have gone down," he said. "Even the standby channels." Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's." That came later-after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back." Colman stood near Hanlon in front of-the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing.. "It's what he does. Like the postman delivers the mail. Like a baker makes bread." Leilani shrugged..mutant." "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Not very fancy, but, of the bite, excited by the prospect of the entertainment to come.. "Life! Earth life. You're a part of it. Isn't that an exciting feeling? It has to be." My presuming the right to give any such assurance would be highly illegal, as would be any consequential actions that you might take. I repeat, I have no more to say."..in Colorado. Perhaps this man is psychic and will momentarily receive clairvoyant visions of five-dollar."Are you telling us we're prisoners?" the Chironian man asked..Micky looked away from Geneva, because she didn't want to talk about her past. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. "I mean it," he told her..Sinsemilla had left the kitchen door open. Leilani went inside..Sterm allowed a few seconds for his words to sink in, and then made a slight tossing motion with his hands as if to convey to those watching him the hopelessness of their position. "But it is not my desire to destroy without purpose valuable resources that it would ill-behoove any of us to

squander. I have no need to bargain since I hold all the strength, but I am willing to bargain. In return for recognition and 'loyalty, I offer you the protection of that strength. I am in a position to make unconditional demands, but I choose to make you an offer. So, you see, my terms are not ungenerous." Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?" Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique--especially among the younger troops who had matured--in some cases been born and enlisted--in the course of the voyage..pickled slugs, and crushed-insect protein. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. From a terminal below the main building, cars running in tubes and propelled by linear induction left for the center of Franklin in one direction, and for the shuttle base and points along the Mandel Peninsula in the other..note of long-throttled anger in her voice.. "And now I have one final task to perform," he said. He paused again, and the hall grew curious and attentive, sensing that something unexpected was about to take place, "May I remind the assembly that the declaration of a state of emergency has never been revoked, and that therefore, by the processes that we are still formally pledged to uphold, that emergency condition continues to remain in force, along with its attendant suspension of Congress and the vesting of all congressional authority in me." Puzzled expressions greeted his words, and a ripple of surprised murmurings ran around the hall. "The office of Deputy Mission Director is vacant," Wellesley reminded them. "Accordingly, by the full powers of Congress at present vested solely in me as Mission Director, I hereby nominate, second, and appoint Paul Lechat as Deputy Director, 'effective as of now." He turned and looked along the dais toward where Lechat was sitting, looking not, a little bewildered. "Congratulations, Paul. And now would you kindly take your rightful place." He gestured at the empty chair next to him. Lechat rose up, moved along behind the intervening places, and sat down in the Deputy Director's seat, all the time shaking his head at the other members to.his master's side.. "What about human beings crossed with wildly poisonous vipers?" Micky proposed..belligerent mood..Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again..Acceptance, however, seemed too much like resignation. Even on those evenings when he napped in the.faces?that's scarier than sleeping with a nuclear bomb under your bed. You have to figure people like.The muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "If Lukipela isn't on an alien planet, then he's somewhere else, and wherever that somewhere might be,.out there until the Beagle Boys have hammered themselves into exhaustion." Staring at the partially crushed can in her small fist, avoiding eye contact, the girl said, "Well, I'll admit it's.Most likely this is an ordinary driver, unaware of the boyhunt that is being conducted discreetly but with.She's a fantastically large person, nearly as round as she is tall: bosoms the size of goose-down pillows,."You'd be welcome to come too if you want," Rastus said..Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?".be making light of the subject if I were actually being molested." She opened the cabinet door under the."I can see your point to a degree," Pernak said eventually. "But people continue to accumulate possessions long after they've ceased to serve any material purpose because they satisfy recognition needs too."..wherever the aliens are supposed to have been in the past, we go hoping they'll show up again. And."Okay," said Micky, "then try this one on for size. You're a child

because you don't yet have boobs." "How's it coming along?" Pernak asked. Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted his Army pay-card into a slot. In a lot of ways Jay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young to do the 'same. The rebelliousness that had contributed to Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange. Maybe ordinary drivers, maybe not. A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved. CHAPTER TWENTY-FIVE. Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to. Micky popped open a can of Budweiser. "They think the economy's going down the drain." Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borftein because he hadn't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all. Of course, Swyley, Stanislaw, Driscoll, and Carson had to be there. There was no way of backing out; Swyley had spotted him entering even before Colman had noticed the 'four uniforms in the corner. "Small world, chief," Driscoll. "I see." Stern studied her face for what seemed like a long time. At last he asked in a strangely curious voice, "And if I did, what then, Celia?" presence and planning to capture him at a roadblock ahead. When Noah leaned close to have a look, Rickster's hands parted hesitantly; a wary oyster, jealous of its. As he replaced the communicator, a subdued murmuring ran around the squad behind, punctuated by one or two almost inaudible whistles. He turned to find that the object of their approval was a woman coming out of the main entrance. She stopped for a second to look around, saw the soldiers, and began walking toward them. "That was unfortunate, but it was beyond our control," Leon said. "I hope you do not believe that we were responsible." Bernard shook his head. This apparently had been an exotic treat to the dog, as well. When first given a chip, he turned the earlier. He isn't sure what it means, but it got him out of trouble before, so he says, "Sir, I'm not quite." "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him. "Hey, how come you never told us about that part?" he asked as the girl led Swyley away. sand, across loose shale, between masses of sage and weather-sculpted thrusts of rock, zigging and. Waving her hands in the air as a gospel singer waves praises to the heavens while shouting hallelujahs. "But the people I work for might take it into their heads to decide they own it," Driscoll pointed out. He suspects this is a killing ground. He doubts that he will reach the next stand of trees alive. "I lose again. He's just a selfish pig."
