This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then you are floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. Yon press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be..Had the grey man not been wearing his sunglasses against the sunset, he might have noticed something familiar about the sailor, who kept looking at the mountain and would not look back at him. But as it was, he suspected nothing..Crawford looked away from the madly whirling rotors of the windmill farm. He was with the rest of."You might," said Amos. But though his heart was with Jack, he still felt a good spirit was important to keep up. "But we might see it a lot more clearly from the top of this mountain," But as he said it, the last light of the moon winked out. Now even the stars were gone, and the blackness about them was complete. Now do not get the idea that everyone here is simply sitting around playing Zorphwar. That is far from the case. While our schedules have slipped a bit in the last couple of months, morale is at an all-time high. With a crew of satisfied programmers, I feel there is nothing we cannot accomplish. Even so, he stood at the rail a long time till a sound in the darkness roused him. "Sir," I say, "there's nothing we can do here. We're just going to have to return home and let Earth figure a way out of this thing. Let them handle it." Absurd, absurd, I know how absurd the suggestion is even as I voice it, no one on Earth is going to be able to defy the edict.
